smb solutions

Turn Your CCTV into Proactive AI

We transform traditional, passive camera networks into an AI-powered analytics layer–delivering real-time insights and instant alerts.

What is smb solutions?

A solution that bridges the gap between traditional surveillance and actionable intelligence. Our modular AI platform extracts real-time data from your existing cameras to make your enterprise smarter, safer, and more profitable.

Turn existing cameras into intelligent systems

We handle the heavy lifting so you don't have to. Deploy AI-powered analytics on your existing CCTV infrastructure and gain insights that actually matter.

10k+

Cameras supported across enterprises & smart cities

80+

AI models optimized for real-world scenarios

99.7%

Detection accuracy continuously improved

24/7

System uptime enterprise grade reliability

Outdated CCTV systems miss actionable intelligence, causing severe revenue loss and security risks.

Blind Insights

Untracked customer behavior and unoptimized layouts leave up to 30% of potential sales untapped.

Costly Shrinkage

A lack of real-time monitoring allows undetected theft to silently erode critical profit margins.

Operational Friction

Poor crowd management creates severe bottlenecks, slashing throughput and degrading overall satisfaction.

Delayed Detection

Passive cameras fail to flag anomalous access, leaving facilities dangerously exposed to rising threats.

Transforming surveillance into strategic assets.

smb solutions converts your existing camera feeds into a proactive intelligence platform, delivering the real-time insights needed to optimize operations and drive enterprise growth.

01

AI Powered Intelligence Hub

Real-time AI turns your cameras into intelligent data. Deploy powerful video analytics instantly—no new hardware required.

02

Sector-Specific Analytics

Purpose-built AI modules for retail, healthcare, and infrastructure. From smarter layouts to secure perimeters—insights that move your KPIs.

03

Seamless Integration

Works with your existing cameras—cloud or on-premise, zero overhaul. Real-time alerts and pay-as-you-grow pricing, built to scale with you.

Live Monitoring

Real-time AI analytics to enhance security, safety and operational efficiency across multiple environments.
